## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement filed January 3, 2006 has been placed in the application file and the information referred to therein has been considered as to the merits.

### ***Allowable Subject Matter***

Claims 1-19, 23 and 25 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for protecting stored information from unauthorized access. Each independent claim identifies the uniquely distinct features of "storing media validation data in the writeable area of the medium, storing media validation data in the read only area of the medium and using the two values to determine authorization for access to the information stored on the medium." The closest prior art, Bell (US patent application 20040156503), discloses a conventional system for protecting stored information on a disk fails to anticipate or render the above underlined section obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
